

ENABLE JAVASCRIPT

BROWSER

CHROME:

windows

Mac

Select **Chrome** from the Apple/System bar at the top of the screen.

1. Select **Preferences...** from the drop-down menu.
 2. In the left-hand column, select **Privacy and security** from the list.
 3. Under the **Privacy and security** section, click **Site settings**.
 4. Under the **Content** heading, select the **JavaScript**.
 5. Adjust the blocked setting to **Allowed** (from blocked).
 6. Finally, **refresh** your browser.
-

iOS

Follow these instructions to activate and enable JavaScript in iOS on the iPhone and iPad.

Safari iOS

1. Select the **Settings** application/icon on the iPhone home screen.
 2. Select **Safari** on the following screen.
 3. Select **Advanced**, located near the bottom of the following screen.
 4. Move the **JavaScript** toggle to the **right** so that it highlights **green**.
-

Android Chrome

Follow these instructions to activate and enable JavaScript in Chrome on your Android.

1. Look to the right of the address bar and click the icon with **3 stacked dots**.
 2. Select **Settings** from the drop-down menu.
 3. Select **Site settings** under the advanced heading.
 4. Select the **JavaScript** menu item.
 5. Click the **toggle** to the right so that the toggle turns blue.
 6. Back out of the settings and **refresh** your browser.
-

Microsoft Edge and Internet Explorer (IE)

Follow these instructions to activate and enable JavaScript in Microsoft Edge and Internet Explorer (IE) web browsers.

Microsoft Edge

1. Click the **three dots** in the upper right-hand corner of the browser window.
2. Select **Settings** from the drop-down menu.
3. Select **Cookies and site permissions** from the left-hand menu. (Click the three stacked lines in the upper left hand corner to open the left-hand navigation, if it's closed)
4. Underneath the **All Permissions** heading, select the **JavaScript** menu item.
5. Toggle the **Allowed** setting to the right so that the toggle turns blue.
6. Close the settings window and **refresh** your browser.

Microsoft Internet Explorer

1. Click the **gear icon/Tools menu** to the right of the Internet Explorer address bar.
 2. Select **Internet Options** from the drop-down menu.
 3. Next, select the **Security** tab at the top of the dialog box.
 4. Then, select the **earth (Internet)** icon.
 5. Then select the **Custom Level** button under the **Security level for this zone** section.
 6. Locate the **Scripting** section within the list.
 7. Under **Active Scripting**, select **Enable**, then hit **OK**.
 8. Answer **yes** to the following conformation box.
 9. Hit **OK** to close the Internet Options window.
 10. Finally, **refresh** your browser.
-

Firefox

Follow these instructions to activate and enable JavaScript in the Firefox web browser.

PC & MAC

1. Open a new Firefox browser window or tab.
 2. Copy the following then paste it into the Firefox address bar: **about:config**
 3. Hit the **Enter** key.
 4. On the following page, click the "**Accept the Risk and Continue**" button.
 5. Click the **Show All** button at the top of the browser window.
 6. Find the **javascript.enabled** row under the **Preference Name** heading.
 7. Click the toggle button in the right-hand column of the **javascript.enabled** row to toggle the value from "False" to "True".
 8. Close the preferences window and **refresh** your browser.
-

Safari

Follow these instructions to activate and enable JavaScript in Safari.

PC

1. In the **Edit** drop-down menu at the top of the window, select **Preferences...**
2. Select the **Security** icon/tab at the top on the window.
3. Then, check the **Enable JavaScript** checkbox.
4. **Close** the dialog box to save your changes.
5. Finally, **refresh** your browser.

MAC

1. Select **Safari** from the **Apple/System bar** at the top of the screen.
2. From the drop-down menu, select **Preferences**.
3. Select the **Security** icon/tab at the top of the window.
4. Check the **Enable JavaScript** checkbox under the **Web content** category.
5. **Close** the dialog box to save your changes.
6. Finally, **refresh** your browser.

Opera

Follow these instructions to activate and enable JavaScript in the Opera web browser.

PC

1. Click the **Opera icon ("O")** in the upper left-hand corner of the browser window.
2. Select **Settings** from the menu.
3. Scroll down to the **Privacy and Security** section.
4. Select the **Site Settings** menu item.
5. Under the **Content** heading, select the **JavaScript** menu item.
6. Toggle the **Allowed** setting to the right so that the toggle turns blue.
7. Close the settings window and **refresh** your browser.

MAC

1. Select the **Opera** menu item from the **Apple/System bar** at the top of the screen.
2. Scroll down to the **Privacy and Security** section.
3. Select the **Site Settings** menu item.
4. Under the **Content** heading, select the **JavaScript** menu item.
5. Toggle the **Allowed** setting to the right so that the toggle turns blue.
6. Close the settings window and **refresh** your browser.
